OUR MISSION

**We improve the quality of life for
children and adults who suffer
from Allergy, Asthma and
Immunology related illnesses.**

*Leaders in Allergy and Asthma Care
for Over 40 Years*

STAFF AND OFFICES

We are proud of the skilled, compassionate and efficient staff of Colorado Allergy & Asthma Centers. They greatly contribute to the responsiveness and quality of your care.

Health Care Staff:

- Physician's Assistants (PAs): take histories, perform exams, prescribe and refill medications, and treat acute illness, all under the guidance of a physician.
- Nurses, Medical Assistants, Respiratory Therapists: assist with patient visits, administer allergy injections, immunizations and medical treatments, triage phone calls, refill and process prior authorizations for medications, perform skin testing.

Office Staff:

- Front desk personnel: provide a professional and friendly atmosphere, schedule convenient appointments, manage telephone calls, and provide information for billing and insurance.

Katherine Tsai, M.D.

Dr. Katherine Tsai joined Colorado Allergy and Asthma Centers in July 2009. She is board certified by both the American Board of Allergy and Immunology and by the American Board of Internal Medicine.

She received her bachelor's degree from University of California Irvine and Doctor of Medicine from Washington University in St. Louis School of Medicine. She completed internship and residency training at Washington University in St. Louis.

Dr. Tsai's treatment philosophy is to provide excellence in allergy and asthma care with compassion and respect. Her goal is to help patients control their allergy and asthma symptoms and improve their quality of life.

Immune Deficiency

YOUR FIRST VISIT

Before your first visit you will be provided with a comprehensive medical history form. This will either be mailed to you or may be accessed on our web site at www.ColoradoAllergy.com. You need to bring this completed to your initial visit.

Your first visit generally includes a thorough medical history, examination, and testing. Based on the evaluation the doctor will formulate a diagnosis and recommend treatment options. The treatment plan which you and your doctor have chosen will be outlined in detail. Education regarding your diagnosis and treatment plan is an important part of your initial visit.

A patient's symptoms can vary with age, season, environment, general health, diet, and even stress. Based on all of these factors, as well as any other relevant issues, we will work with you to design a treatment program which results in the most effective therapy for your medical problems. Our goal is to arrive at a treatment plan which allows you to take control of your asthma or allergy issues. At any time during your visit, please feel free to ask questions if there is something that you do not understand.
