OUR MISSION

We improve the quality of life for children and adults who suffer from Allergy, Asthma and Immunology related illnesses.

Leaders in Allergy and Asthma Care for Over 40 Years

Manujendra Ray, M.D., Ph.D.

Dr. Manujendra (Manu) Ray joined Colorado Allergy & Asthma Centers in August 2013. He is board certified in Internal Medicine and will soon be certified in Allergy and Immunology.

Dr. Ray received his Medical degree from Kasturba Medical College at Manipal University in India. His interest in the immune system led him to the Pennsylvania State University where he received his PhD in Immunobiology. He subsequently returned to the realm of clinical medicine and completed his residency in Internal Medicine at Akron General Medical Center in Akron, Ohio and a fellowship in Allergy and Immunology at the Hospital of the University of Pennsylvania in Philadelphia. As a part of his fellowship he also trained at the Children's Hospital of Philadelphia (CHOP).

Dr. Ray is a member of the American Academy of Allergy, Asthma and Immunology and the American College of Allergy, Asthma and Immunology. He served as Clinical Instructor of Internal Medicine at Northeastern Ohio Universities College of Medicine (now NEOMED) from 2009 to 2011 and has been recognized for excellence in teaching. He brings with him extensive research experience and is published in numerous peer-reviewed journals. At the University of Pennsylvania he trained under some of the leading experts in the fields of Allergy and Immune deficiency.

Dr. Ray continues to strive for excellence over both the basic science and clinical aspects of Allergy and Immunology, and believes in innovative and cost-effective medical care tailored to the needs of the individual patient. He enjoys seeing children of all ages and adults in the clinic.

Insect Allergy

Immune Deficiency

YOUR FIRST VISIT

Before your first visit you will be provided with a comprehensive medical history form. This will either be mailed to you or may be accessed on our web site at www.ColoradoAllergy.com. You need to bring this completed to your initial visit.

Your first visit generally includes a thorough medical history, examination, and testing. Based on the evaluation the doctor will formulate a diagnosis and recommend treatment options. The treatment plan which you and your doctor have chosen will be outlined in detail. Education regarding your diagnosis and treatment plan is an important part of your initial visit.

A patient's symptoms can vary with age, season, environment, general health, diet, and even stress. Based on all of these factors, as well as any other relevant issues, we will work with you to design a treatment program which results in the most effective therapy for your medical problems. Our goal is to arrive at a treatment plan which allows you to take control of your asthma or allergy issues. At any time during your visit, please feel free to ask questions if there is something that you do not understand.
