OUR MISSION

We improve the quality of life for children and adults who suffer from Allergy, Asthma and Immunology related illnesses.

*Leaders in Allergy and Asthma Care
for Over 40 Years*

STAFF AND OFFICES

We are proud of the skilled, compassionate and efficient staff of Colorado Allergy & Asthma Centers. They greatly contribute to the responsiveness and quality of your care.

Health Care Staff:

- Physician's Assistants (PAs): take histories, perform exams, prescribe and refill medications, and treat acute illness, all under the guidance of a physician.
- Nurses, Medical Assistants, Respiratory Therapists: assist with patient visits, administer allergy injections, immunizations and medical treatments, triage phone calls, refill and process prior authorizations for medications, perform skin testing.

Office Staff:

- Front desk personnel: provide a professional and friendly atmosphere, schedule convenient appointments, manage telephone calls, and provide information for billing and insurance.

Grant C. Olson, M.D.

Dr. Grant Olson joined Colorado Allergy and Asthma Centers in 1996 after four years in private practice on the Lutheran Medical Center campus. He is certified by the American Board of Pediatrics and the American Board of Allergy and Immunology.

Dr. Olson received his Bachelor's Degree from Colorado College and Doctor of Medicine from the University of Colorado School of Medicine. He completed his pediatric residency and fellowship training in allergy and immunology at Fitzsimons Army Medical Center. Dr. Olson served as Chief of Allergy and Immunizations and Medical Director of Respiratory Therapy Services at Fort Hood in Texas. He also served as President of Colorado Allergy and Asthma Society from 2000-2002.

Dr. Olson is an advocate of patients rights and believes the patient and the patient's family are integral parts of the therapeutic team who must be intimately involved in treatment decisions and active in patient care. Dr. Olson enjoys the opportunities available through the practice of allergy and clinical immunology for patient education, cutting-edge research and improving the quality of life for patients.

Insect Allergy

Immune Deficiency

YOUR FIRST VISIT

Before your first visit you will be provided with a comprehensive medical history form. This will either be mailed to you or may be accessed on our web site at www.ColoradoAllergy.com. You need to bring this completed to your initial visit.

Your first visit generally includes a thorough medical history, examination, and testing. Based on the evaluation the doctor will formulate a diagnosis and recommend treatment options. The treatment plan which you and your doctor have chosen will be outlined in detail. Education regarding your diagnosis and treatment plan is an important part of your initial visit.

A patient's symptoms can vary with age, season, environment, general health, diet, and even stress. Based on all of these factors, as well as any other relevant issues, we will work with you to design a treatment program which results in the most effective therapy for your medical problems. Our goal is to arrive at a treatment plan which allows you to take control of your asthma or allergy issues. At any time during your visit, please feel free to ask questions if there is something that you do not understand.
